Preface

FIRST DEEP TECH OPEN SCIENCE DAY CONFERENCE 2024 has been designed as the Science Fair - forum and exhibition of research results in all areas of science and innovation. Deep Tech brings together different fields of science that provoke major changes in the world today, such as:

- Advanced Materials and Manufacturing
- Aerospace
- Artificial Intelligence and Machine Learning
- Biotechnology
- Blockchain
- Web 3.0
- Electronics
- Photonics
- Quantum Computing
- Robotics
- Semiconductors (Microchips)
- Sustainable Green Energy and Clean Technologies

The conference presented an opportunity to gather young researchers and renowned scientists. The conference aimed to bring together young and senior researchers for networking, brainstorming, and promotion of science to scholars, students, prospective PhDs and young people and offers students the opportunity to experience the practices of science and engineering.

Deep Tech Open Science Day Conference 2024, in the form of the exhibition fair, was held on April 5, at Faculty of Engineering, University of Kragujevac. The Conference was opened by the vice-rector of University of Kragujevac, Vladimir Rankovic, dean of the Faculty of Engineering, Prof. Dr. Slobodan Savić, dean of the Faculty of Science, Prof. Dr. Marija Stanić, the State Secretary, Ministry of Science, Technological Development and Innovation, Prof. Dr. Miroslav Trajanović, CEO of MIND – Milanović Industries Group, Darko Djorić, the coordinator of the Innovation Incubator of University of Kragujevac, Nemanja Jovičić and Conference General Chair, Prof. Dr. Fatima Živić, Faculty of Engineering, University of Kragujevac.

Conference Organizing Committee, Prof. Dr. Fatima Živić and Prof. Dr. Nenad Grujović, from Faculty of Engineering, Prof. Dr. Boban Stojanović and Prof. Dr. Ana Kaplarević-Mališić, from Faculty of Science, University of Kragujevac, delivered the talks related to the Conference background:

- What is Deep Tech?
- Additive Technologies and Innovations
- Spinoff companies – the path from the research to market
- Why do we need market validation of research thesis?

Panel discussion “STARTUPS: yes or no?” was held with panelists: Dr. Vesna Rašković Depalov, EEN Serbia – BINS, Novi Sad, Dr. Nevena Mihailović, founder of HerbaLab cosmetics, research associate at the Institute of Chemistry, Faculty of Science, University of Kragujevac and Nemanja Jovičić, coordinator of the Innovation Incubator of the University of Kragujevac who discussed the Research commercialization, Intellectual property

rights in multidisciplinary teams, Experiences of startup founders – what is the most challenging?, and How can the Innovation Incubator of the University of Kragujevac help in founding the startup.

More than 90 research groups presented their works as physical exhibits, posters and virtual presentations, including two high school student teams and several student teams, as well as more than ten companies that have joint research with University of Kragujevac. Different state-of-the-art scientific areas were presented. Conference had more than 500 visitors, including researchers, university students and PhDs, and high school students from three secondary schools, who have discussed scientific topics with researchers and made contacts for further collaborations.

DeepTech Open Science Day Conference 2024 was jointly organized by the Faculty of Engineering and Faculty of Science, University of Kragujevac, as the first scientific Conference of such concept in Serbia, with scientific articles presented through exhibits, sample model, real systems and machine elements, virtual show and simulations, providing hands-on experience on science for young and prospective researchers. The objective of the Conference and training event was to promote and educate on Deep Tech and science to the HEI academics and non-academics, researchers, and young people, as well as to the companies and general public and to enable networking between the HEI innovation ecosystem stakeholders. Most participants were from the Faculty of Engineering and Faculty of Science, but there were also participants from the Faculty of Philology and Art, Faculty of Economics, Faculty of Medical Sciences, and Institute for Information Technologies from University of Kragujevac, as well as from companies that have joint research with University of Kragujevac, Serbia.

The Conference was very successful with participation of the large number of young people – young researchers and prospective researchers and PhD students. The Conference model of scientific research fair showed that such a new concept of scientific work presentation is very well accepted by the young people who actively participated during the whole time of the Conference. Special contribution to the Conference was participation of the “Lego musketeers” team of the high school students who won the 1st Prize at national championship, the 1st Prize in finals of the Lego league in Slovenia and won Engineering Excellence award 1st place at FLL Florida Sunshine Invitational world event on June 19 – 22, 2024 – First Lego League Florida Sunshine Invitational, USA.

TABLE OF CONTENTS

PLENARY TALKS	2
What is Deep Tech?	3
Additive Technologies and Innovations	5
Spinoff companies - The Path from Research to Market	7
Problem/Solution Fit in the Lifecycle of DeepTech Startups	9
DeepTech vs ShallowTech	11
1. ADVANCED MATERIALS	13
Impact of isorhamnetin on 5- fluorouracil resistant colon cancer cells.....	14
Recombinant spider silk – a promising biomaterial for tissue and biomedical engineering	15
Bone Graft in Orthopedic Surgery	16
Development of Electrospun Chitosan-based Nanofiber Dressing with Incorporated Antibiotics for Tissue Regeneration.....	17
Application of magnetocaloric materials in cooling systems	19
Hybrid polymer composites epoxy/PVB reinforced with single- wall/double- wall carbon nanotubes	20
Density measurement of ZA- 27 and A356 alloy based nanocomposites using analytical balance	22
Hardness measurement of ZA- 27 and A356 alloy based nanocomposites	23
Evaluation of Deformation Strengthening in Modern Sheet Metals	24
Material color influence on press- fitting printing material characteristics	26
New Sustainable Composites for Fused Deposition Modeling (FDM) 3D printing in Furniture Industry	27
Tribological properties of different 3D printed polymer samples	28
The wear resistance of PETG polymers obtained by 3D printing.....	29
Tribocorrosion of Advanced Materials	30
Tribology Behavior of The Epoxy Primer Coating on the Shot Blasted Aluminium Alloy AlMg4.5Mn0.7	31
2. BIOTECHNOLOGY AND LIFE SCIENCES	32
Advancements in gamma knife dosimetry: Developing the FOTLEKS Monte Carlo software for enhanced 3D dose calculation in medical physics	33
The ongoing impact of climate change on fish species in aquatic ecosystems in Serbia	34
Prediction of Soil Types Using Plant Chemical Profiles: Application of Machine Learning in Plant Ecology	35

Meta-analysis of the association of genetic variants in the NOS3 gene with the risk of prostate cancer development	36
Investigating the impact of ionic liquid cosolvents on Rh(III) complexes' interactions with 5'-GMP and CT-DNA	37
Study of the interactions between gold(III) complex containing 9,10-diaminophenanthrene and DNA.....	38
The interactions with transport protein (BSA) of the selected 2,4-diketo ester derivative as a potential antitumor agent	39
Application of immobilized proteases in the fractionation of sunflower meal	41
Spectral Domain Optical Coherence Tomography (SD-OCT) in assessment and monitoring of therapeutic outcome in diabetic macular edema.....	42
3. ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING, INCLUDING BIG DATA.....	43
Application of computer vision and deep learning techniques in improving safety at work	44
Efficient Generation of Diverse Instances for P Cmax Solver Evaluation	45
Utilization of Lung Segmentation Algorithm to Monitor Overall Recovery in Premature Infants with Respiratory Distress Syndrome.....	46
Evolutionary Approach for Composing a Thoroughly Optimized Ensemble of Regression Neural Networks	47
Introducing Version Control and Revision History in Online Document Management System	48
Artificial Intelligence Defect Detection Solutions for Small and Medium Enterprises	49
Physics Informed Neural Network Modeling of Oxygen Diffusion	50
The Effects of Deep Learning on the Prediction of Aneurysm Rupture.....	51
Assessment of mechanical properties of austenitic stainless steels using artificial neural networks	52
4. ADVANCED COMPUTING.....	53
Developing the procedure for damage simulation in metallic structures due to cyclic loading - DEEDS	54
Prediction of damage evolution in engineering structures - PROMINENT	55
Numerical Modeling of Coupled Fluid - Solid Dynamics	56
The linear strain field of 4- node tetrahedral finite elements created using strain smoothing method.....	57
Application of Altair software in structural analysis of complex geometry	58
FEM Analysis of Hypereutectic Al-Si Piston.....	60
Advancements in Mammographic Simulation: The MAMOVox Optimization Approach	61
Customized user implementation of material models in PAK-S software	62
5. ADVANCED MANUFACTURING.....	63
Design and production of a single-stage cylindrical gearbox model.....	64
Design and modeling of a single-stage conical reducer.....	65

CONFERENCE SPONSOR, DEEPTech- 2M project "Deep Tech Materials and Manufacturing Talent Development for an Improved EU Economy and Climate" <http://deeptech2m.eu/>

Four-axis FDM printing – Novel Methodology for Scaffold Fabrication	66
Investigation of dominant modes of heat transfer and thermal stability of the classic cycloid reducers concept	67
Development of Components for a Water Hydraulic Axial Piston Pump - Tribological Aspects of the Research	68
Design of Stoves for Terraces and Gardens	69
Stability of rectangular plates with elastic clamped edges	70
Optimization of Gear Pair in Planetary Gearbox Using TOPSIS Method	71
Multifunctional Device for Measuring the Kinematic Coefficient of Friction and Testing the Micro Cutting Process	72
Development of a Tool for Friction Stir Processing	73
Prototypes of Bone Fixation Devices made from different 3D Printing Infill	74
Comparative study of different 3D printed PETG joining techniques	75
Reengineering of RepRap 3D Printers	76
6. ELECTRONICS AND PHOTONICS	77
Support of SMEs in Serbia in the Process of Manufacturing Electronic Devices	78
A Sequence of FPGA-based Digital System Design Laboratory Exercises with Simple Electronic Piano Realization as the Outcome	79
A Wide Tuning Range Digital Frequency- Locked Loop Synthesizable from Standard Logic Cells	80
7. ROBOTICS	82
Neuroergonomic Assessment of Mental Workload in Adaptive Industrial Human- Robot Collaboration	83
8. VIRTUAL REALITY, AUGMENTED REALITY, METAVERSE	85
Personalized Preoperative Planning of Hip Endoprosthesis Implantation Using 3D Digital Templating	86
Virtual Laboratory Exercises Which Utilize Audio Signals to Enhance Understanding of Electronics Fundamentals	87
Real-time video analytics for detecting illegally parked vehicles	88
9. INTERNET OF THINGS, W3C, SEMANTIC WEB, WEB 3.0	89
Extended SEFRA framework for e-office systems in the Serbian-speaking region	90
Advanced Technologies for Financial Information Systems in Large Companies	91
10. SUSTAINABLE ENERGY AND CLEAN TECHNOLOGIES	92
Smarticity	93
The Hydrogen Application at IC Engine	94
The Problem of Brake Wear and Environmental Pollution with Particles Obtained by Brake Wear - a New/Old Source of Pollution?	95

Abstract

The current infrastructure in the Republic of Serbia in the field of municipal waste collection is not sufficient to meet the requirements of the EU Waste Directive, so it is necessary to improve collection processes through the application of innovative digital technologies. This research aims to develop a comprehensive methodology for optimising the municipal waste collection process. Furthermore, the aim is to assess the efficiency of integrating smart sensors into waste collection bins to improve the overall waste management system. By using such smart solutions, the goal is not only improving operational efficiency, but also enhance user services, thereby advancing sustainable waste management practices at the local level in Serbia.

This research investigates the concept of a smart municipal waste management system, focusing on the implementation of innovative solutions to improve waste management efficiency. The waste management system creates more efficient conditions from the aspect of environmental protection by integrating technologies such as GIS, robotics, AI, IoT, neural networks, cloud computing and data analytics. The primary scientific objective of this research is to establish a methodology for optimising the municipal waste collection process in urban areas using smart solutions. Furthermore, research assesses the technological potential by examining innovative solutions such as smart sensors for waste collection bins. These advanced tools in waste management systems enable precise mapping and analysis of waste generation patterns, allowing the development of more efficient waste collection strategies.
